

PRODUCT OVERVIEW

Mobile-Matic portable automated A-Frame dispensing units eliminate picking labor, maximize throughput, reduce errors and increase efficiency regardless of the size of your operation. Mobile-Matic is easily integrated into your current distribution system with minimal planning or modifications. Simply stack product into the channels, roll the unit up to your conveyor and plug it in. Connected to your network, the Mobile-Matic automatically dispenses items into the correct totes, shippers or belt.

The Mobile-Matic allows for up to 2,200 orders per hour – increasing efficiency and throughput while reducing labor requirements

MOBILE-MATIC™

Portable A-Frame Systems
